SUMMARY

Full-stack developer building multi-tenant web apps and automation systems: role-based access, row-level security, server-side validation, race-condition-safe bookings. Stack is TypeScript and Next.js on Postgres via Supabase, plus n8n for workflow automation.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, Python, C++
- Frameworks:** Next.js, React, Node.js, Tailwind CSS
- Databases / Backend:** PostgreSQL, Supabase, REST APIs
- Tools / Automation:** Git, Vercel, n8n

EXPERIENCE

- Freelance Software Developer**

Fiverr (Freelance)

 - Built n8n + Postgres + LLM automation pipelines handling WhatsApp-based appointment booking, intake and follow-ups for a clinic system (4 pipelines, 148 nodes), with a team of four.
 - Owned system architecture and workflow design, including state handling across multi-step conversations and idempotent message processing.
 - Delivered client automation and internal tooling as a freelancer on Fiverr.

Feb 2026 – Present

Cairo, Egypt
- Property Advisor**

Taskeen Egypt

 - Managed client relationships from first contact through deal closure, including lead qualification and property presentations.
 - Matched client requirements to available properties and tracked deals through a CRM pipeline to negotiation and contract finalization.

Nov 2025 – Feb 2026

Cairo, Egypt
- Social Media Specialist**

Shahba Designs

 - Ran the brand's social accounts end to end: content planning, scheduling, posting and audience engagement.
 - Shot and edited video content for campaigns.

Aug 2025 – Oct 2025

Cairo, Egypt

PROJECTS

- Real Estate CRM for Brokerage Firms** — Multi-tenant CRM for Egyptian real estate brokerages; leads route from a shared pool down through managers, team leaders and agents. ([Live demo](#))

Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Row Level Security, Vercel

 - Postgres row-level security enforcing per-agent data isolation across a shared multi-tenant schema.
 - Server-side lead-discipline rules: daily pull cap, mandatory comments on status changes, stale leads recycled back to the pool.
- Top Notch Athletics: Gym Management Platform** — Bilingual (EN/AR, RTL) Next.js platform pairing a public marketing site with a role-separated internal system for admins, staff, coaches and athletes. ([Live demo](#))

Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Row Level Security, Vercel, Evolution API, i18n/RTL

- Attendance via permanent per-account QR codes, with subscription status, sessions-remaining and duplicate-check-in validated server-side.
- Row-level security isolating data by role at the database layer, plus WhatsApp expiry reminders wired to subscription state in Postgres.

Avoure — Luxury Home Decor Storefront — Headless e-commerce storefront on Medusa v2 + Next.js 15 for a Cairo home-decor brand. ([Live demo](#))

Next.js, Medusa v2, TypeScript, Tailwind, Supabase

- Single-page progressive checkout with a cash-on-delivery flow and guest order tracking.
- Demo runs fully client-side against a mocked catalog, cart and order API, with no live backend.

Avoure — Commerce Admin Dashboard — The Avoure store's Medusa admin dashboard with a custom store-lock widget. ([Live demo](#))

React, Medusa Admin SDK, MSW, TypeScript

- Runs backend-free via a Mock Service Worker API layer intercepting the Medusa Admin SDK's requests.
- Orders, products, customers and inventory are browsable and editable; edits persist in-session until reload.

Clinic Automation System — n8n + Postgres + LLM WhatsApp booking and automation system for a clinic: 4 pipelines, 148 nodes. ([GitHub](#))

n8n, PostgreSQL, LLM, WhatsApp API

- Multi-step conversation state managed across pipelines so a WhatsApp thread can span booking, rescheduling and follow-up without losing context.
- Idempotent webhook handling so retried WhatsApp events don't double-book or duplicate messages. Built with a team of four; owned architecture and workflow design.

EDUCATION

B.Sc. in Computer Science	2024 – 2028 (Expected)
<i>Egyptian Chinese University</i>	<i>Cairo, Egypt</i>

LANGUAGES

Arabic (Native), English (Fluent), Spanish (A1, in progress), German (Basic)
